Projects

01/2025 – 02/2025

Built a personal portfolio website using React.js
Developed a responsive and visually engaging personal portfolio using React.js. The website features animated transitions and a clean, modern UI, showcasing personal details, skills, projects, and contact information. Utilized HTML, CSS, Bootstrap, and JavaScript to craft dynamic components and interactive sections, demonstrating front-end development proficiency.

04/2025 – 04/2025

Booksky
built using HTML, CSS, and JavaScript! The website functions like a to-do list, where users can add, read, and delete their entries. Whether it's writing stories, noting down book names, authors, or descriptions, users can effortlessly manage their creative ideas with just a click of the "Add" button.

10/2024 – 12/2024

Bike Rental System Web Application
Peoples travelling in motor bikes have increased in recent years. Many high-model motor bikes are introduced, and many people travel hundreds of kilometers on these bikes. However, such bikes are expensive, making it difficult for everyone to afford them. As a result, bike hiring has become increasingly popular. Unfortunately, there is no complete web application to handle the hiring process. This project is a web platform that allows users to hire the motorbike of their choice.

03/2023 – 05/2023

Digital Certificate Generation for Bonafide
This system automates the process of generating bonafide certificates for students. It generates digital certificates in Portable Document Format (PDF), which is widely accepted. The goal is to simplify and digitize certificate issuance for educational institutions.
