Projects

02/2026 – 02/2026

Flight Search Web Application
Developed a responsive Flight Search Web Application using React.js with useState for state management and API integration to fetch flight data dynamically. Built the user interface using HTML, CSS, JavaScript, and Bootstrap to provide a clean and responsive experience.

01/2025 – 02/2025

Built a personal portfolio website using React.js
Developed a responsive and visually engaging personal portfolio using React.js. The website features animated transitions and a clean, modern UI, showcasing personal details, skills, projects, and contact information. Utilized HTML, CSS, Bootstrap, and JavaScript to craft dynamic components and interactive sections, demonstrating front-end development proficiency.

04/2025 – 04/2025

Booksky
built using HTML, CSS, and JavaScript! The website functions like a to-do list, where users can add, read, and delete their entries. Whether it's writing stories, noting down book names, authors, or descriptions, users can effortlessly manage their creative ideas with just a click of the "Add" button.
